

Setting up an account with Metamask(desktop + mobile)

A step-by-step guide on getting started as a collector with MetaMask as your preferred wallet

This is a practical, step-by-step guide on setting up an account as a collector.

If you are new to dealing with cryptowallets, fear not: we'll cover all necessary topics and tools for getting started.

1. How to set up your collector account

Note: Steps for how to set up an account on a mobile device can be found below the desktop steps.

Steps for desktop wallet setup

- First, you'll need MetaMask, an Ethereum wallet and account manager for internet browsers. We recommend using the latest version of Chrome or Firefox. Go to <https://metamask.io/> and install the browser extension, and we also recommend watching their [intro video](#).
- Once MetaMask is installed, click on the little fox icon in your browser extension panel and go through the welcome screens, where you can create a new wallet, create a password, and accept the privacy policy, terms of service and several disclaimers to proceed.

Create Password

New Password (min 8 chars)

Confirm Password

☒ I have read and agree to the [Terms of Use](#)

- Next, you'll see the "Secret Backup Phrase" screen. These 12 words are **VERY IMPORTANT** to save in a private, secure location OFFLINE. They are the only way to restore your account if you get locked out or lose your password. MetaMask will ask you to confirm it to prove you've saved it somewhere.

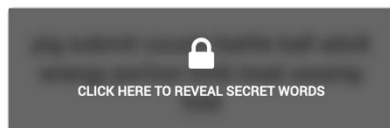

METAMASK

Secret Backup Phrase

Your secret backup phrase makes it easy to back up and restore your account.

WARNING: Never disclose your backup phrase. Anyone with this phrase can take your Ether forever.

Tips:

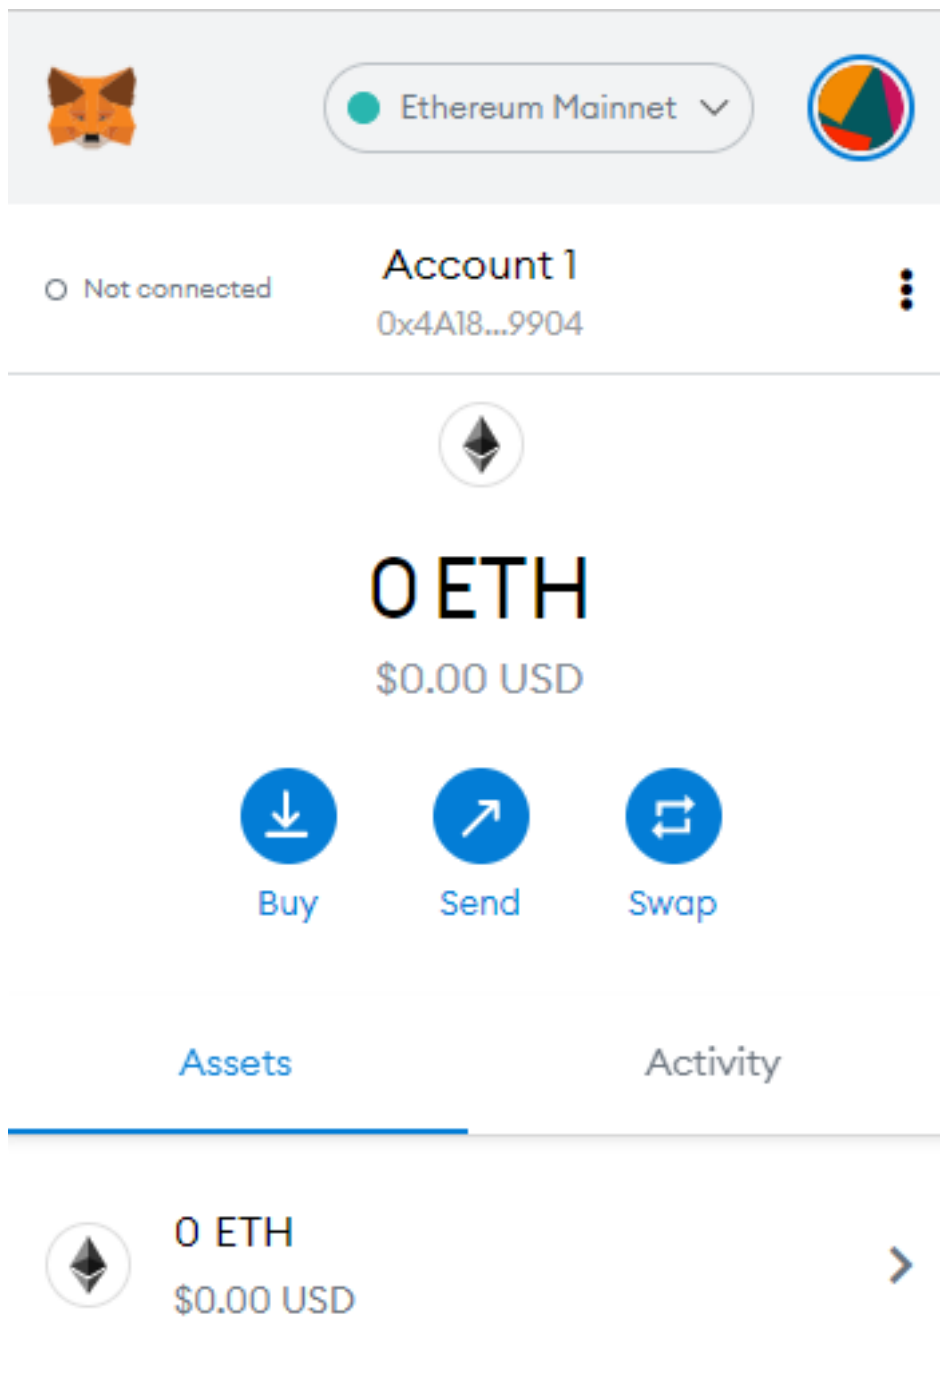

Store this phrase in a password manager like 1Password.

Write this phrase on a piece of paper and store in a secure location. If you want even more security, write it down on multiple pieces of paper and store each in 2 - 3 different locations.

Memorize this phrase.

[Download this Secret Backup Phrase and keep it stored safely on an external encrypted hard drive or storage medium.](#)

- Once you successfully create an account, your MetaMask should look like this. You can now start the account setup on Mintvers.

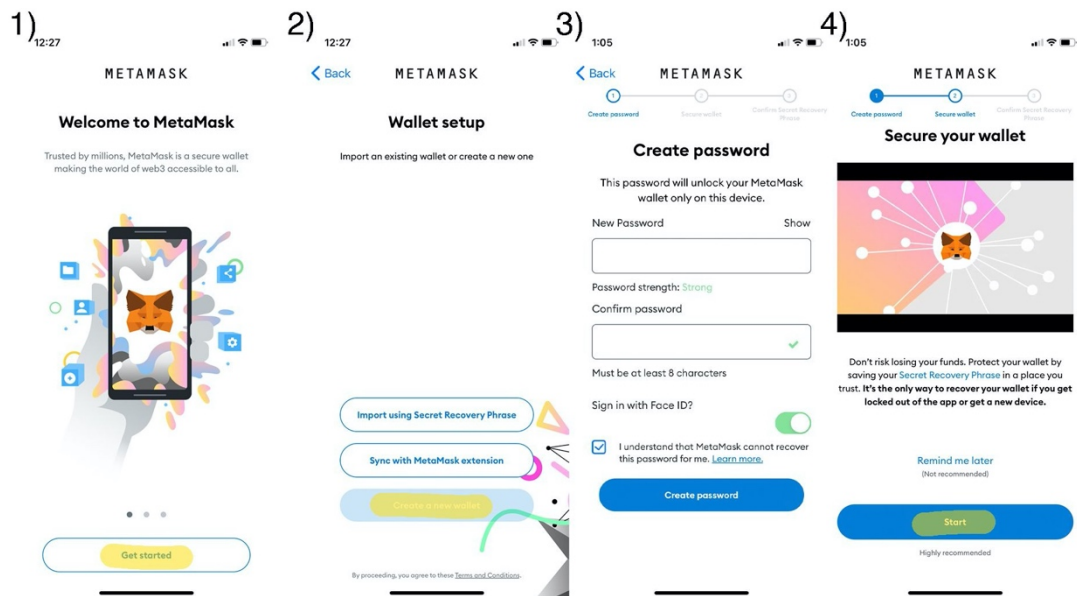

Steps for mobile wallet setup

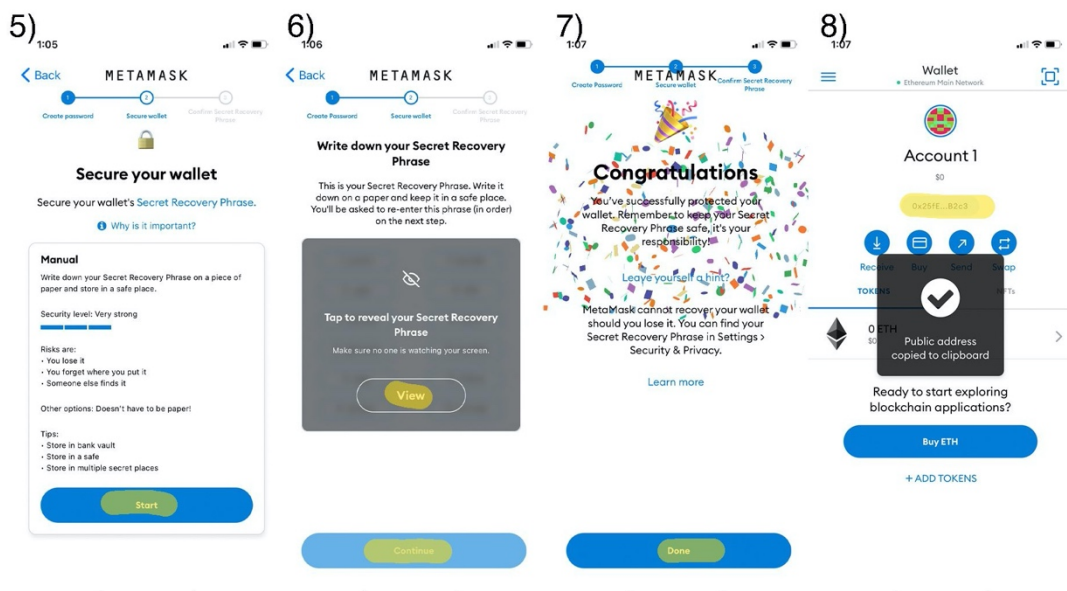

- First, you'll need either the MetaMask Mobile app, or the Opera Browser app. Both can be synced to your desktop, however Opera Browser will automatically create an ETH wallet address for you within the browser, whereas MetaMask has a desktop extension for Chrome or Firefox

- Both apps have a built in browser that must be used to create and use your Mintvers account

For MetaMask Mobile:

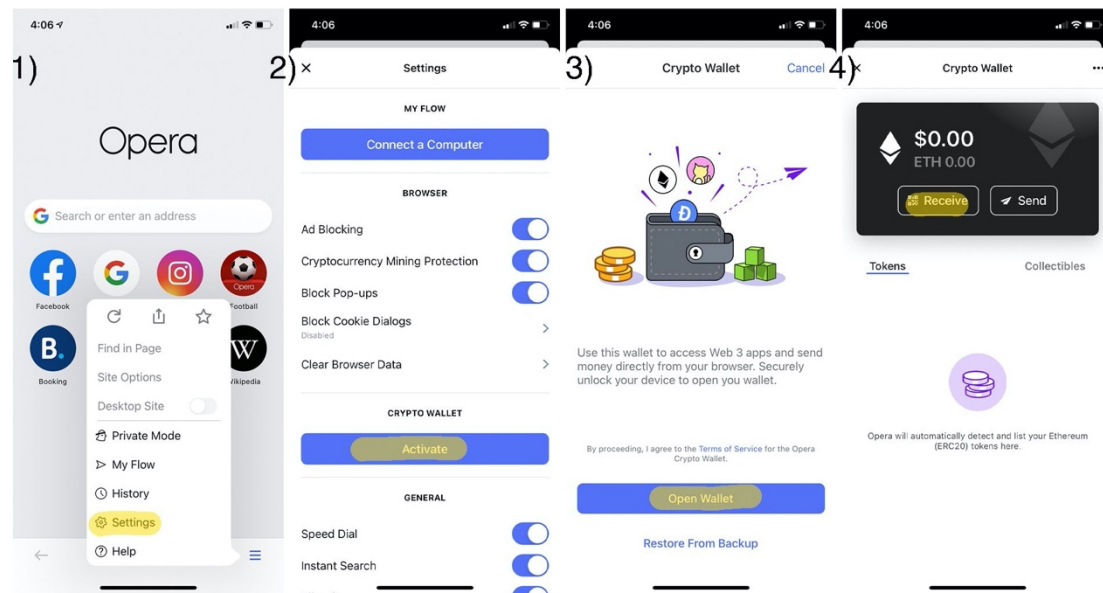

Ensure you write down your Secret Recovery Phrase someplace private and never share it with anyone. Once your account is created, you can click on the public wallet address to copy it to your clipboard. This address will be needed in order to fund your wallet.

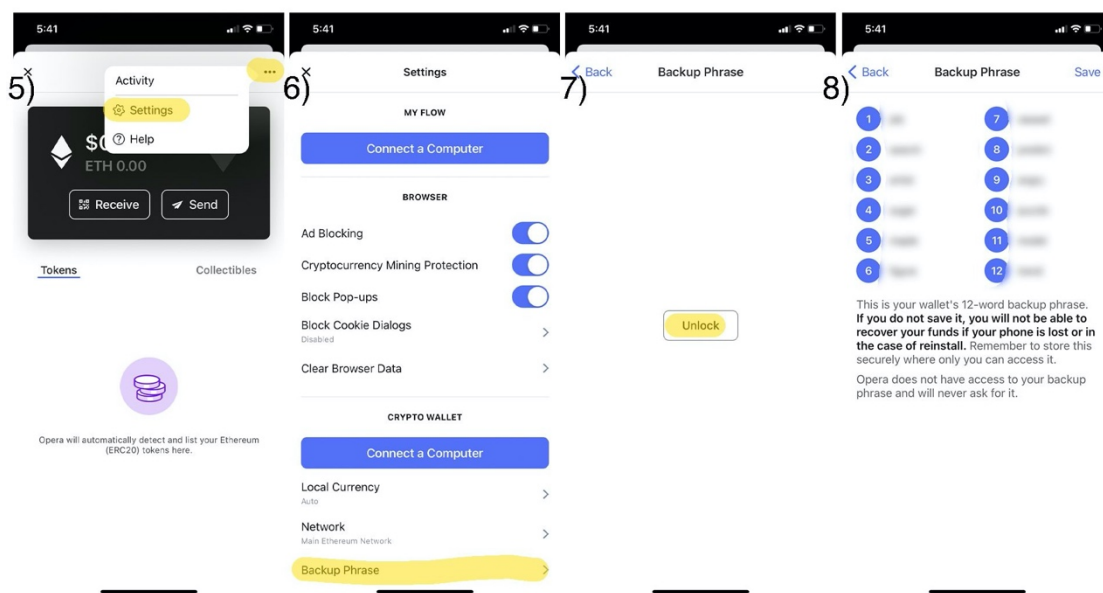

The built-in browser can be accessed by clicking the 3 lines in the top left and selecting Browser

For Opera Browser:

Your public wallet address can be found by clicking the Receive button once you've set your wallet up. This address will be needed in order to fund your wallet.

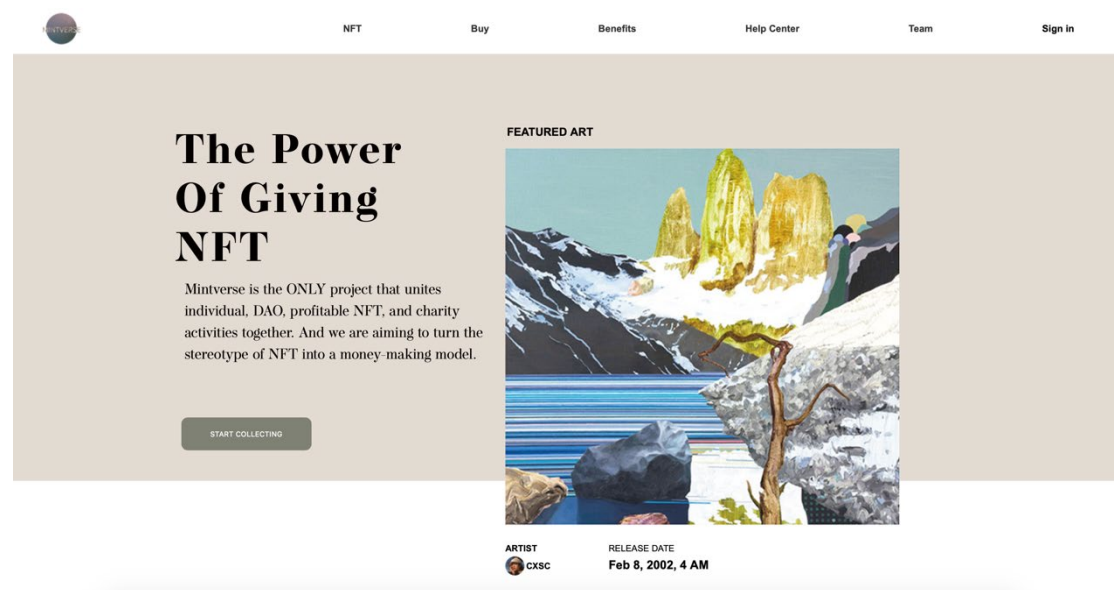

Once your wallet is setup, your Secret Backup Phrase can be found within the wallet settings, ensure you write down your Secret Backup Phrase someplace private and never share it with anyone.

Steps for Mintvers account setup (desktop + mobile)

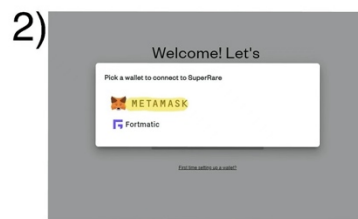

On Mintvers, click the Sign In button, on desktop this is located on the top right of the page, on mobile this is located in the dropdown menu accessible by tapping the 3 lines on the top left.

This must be done from the same browser you have set up your wallet on (for Desktop: Chrome or Firefox, for Mobile: MetaMask app or Opera)

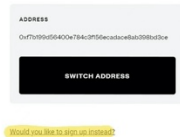

To complete the account setup process, first select a wallet, choose MetaMask, then select the option to sign up for a new account, and fill in your information.

1) Welcome! Let's begin with your wallet.

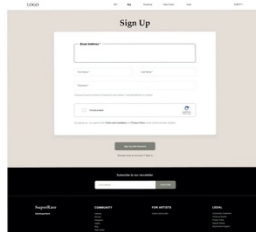

3) Oops! It looks like there's no account linked to that address.

[Would you like to sign up instead?](#)

4) Create a Mintvers Account

When you click Sign Up, your wallet will pop up and ask you to sign. Once you click sign, your account will be fully set up. Your wallet will pop up and ask you to sign anytime you log into your account.

2. How to fund your account

In order to start making offers on our NFT, you'll need to buy some ETH and send it to your wallet address. Buying ETH with your local currency can differ from country to country, but we typically recommend [Coinbase](#) as the easiest way to purchase ETH. When considering your budget, remember you'll need a little extra to cover the gas costs for running the blockchain transactions.

Each site will have a slightly different process, if using Coinbase, information on how to purchase ETH can be found [here on their website](#).

Once you've purchased ETH on an exchange like Coinbase, it's time to send it to your wallet. In order to do this, you'll need to copy your public wallet address.

On desktop, this can be done simply by clicking on the account name within the MetaMask extension.

In the MetaMask Mobile app, this can be done by clicking on the shortened address on your wallet page (begins with 0x)
